

DHANUSH YADAV JANGITI

dhanushyadav.jangiti@gmail.com | +91-9391647335 | LinkedIn | GitHub

PROFILE SUMMARY

AI & Data Science graduate with strong skills in SQL Server, Power BI, Excel, Python, and data analysis. Experienced in ETL workflows, data cleaning, data transformation, data modelling, and dashboard development through hands-on projects. Familiar with SQL Server Management Studio (SSMS), reporting concepts, KPI tracking, and business intelligence solutions. Passionate about converting raw data into actionable insights and supporting data-driven decision-making. Eager to contribute analytical and problem-solving skills in a Junior Programmer Analyst role while continuously learning Microsoft technologies and cloud platforms.

EDUCATION

Bachelor's in Artificial Intelligence and Data Science

APR 2026

Siddharth Institute of Engineering and Technology, Tirupati, India | **CGPA: 8.14**

TECHNICAL SKILLS

- **Python:** (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn)
- **SQL:** Joins, Aggregations, CTEs, Window Functions
- **Databases:** MySQL, Oracle, MongoDB, SQLite
- **Data Analysis:** Data Cleaning, Transformation & Validation, Feature Engineering, EDA, ETL / ELT Concepts, Data Pipeline Development, Data Modelling, Data Collection
- **Data Visualization & Reporting:** Power BI, Excel, Matplotlib, Seaborn, Tableau
- **Tools:** Git & GitHub (Version Control), Jupyter Notebook, Google Collab, VS Code, SSMS (SQL Server Management Studio)

TECHNICAL PROJECTS

Ferns and Petals Sales Analysis Dashboard | Microsoft Excel, Data Cleaning, Pivot Tables, KPI Reporting, Data Visualization {[GitHub](#)}

- Built an interactive dashboard to analyse sales performance and customer behaviour using Excel-based analytical tools.
- Processed and cleaned sales data to maintain consistency and improve reporting accuracy.
- Generated insights on revenue trends, category performance, top products, and average customer spending through dynamic visualizations.
- Enabled business performance monitoring and supported decision-making through KPI tracking and interactive filtering capabilities.
- Organized dashboard logic and analytical findings for efficient reporting and stakeholder communication.

Pizza Sales Analysis Using SQL | SQL, MySQL, CTEs, Views, Window Functions

- Analyzed pizza sales data to uncover revenue trends, customer ordering patterns, and product performance.
- Applied advanced SQL techniques including Joins, CTEs, Aggregate Functions, Views, and Window Functions.
- Identified top-selling pizzas, category-wise revenue contributions, and peak sales periods.
- Generated business insights through sales trend analysis and performance reporting.
- Built analytical queries across multiple relational tables to support data-driven decision-making.

Fake News Detection | *Python, EDA, Data cleaning, ETL*

- Built an NLP data pipeline to classify news articles using TF-IDF feature extraction and logistic regression.
- Experimented with Naive Bayes, Random Forest, and SVM models to improve classification accuracy through iterative EDA and feature tuning.
- Packaged into an interactive Streamlit web app for real-time predictions with clear documentation of model logic.

INTERNSHIP

Python Django Intern – Assistive Infotech Limited

Jan 2024

- Completed a 3-week internship developing a full-stack To-Do List web application with CRUD functionality using Django ORM, SQLite, and HTML/CSS.
- Implemented data models, dynamic views, and templates; managed backend data through Django admin panel — gaining hands-on experience in data storage and retrieval workflows.
- Technologies: Python, Django, HTML, CSS, SQL, Bootstrap, SQLite

CERTIFICATIONS

- Python — GeeksforGeeks ([Certified](#))
- SQL — GeeksforGeeks ([Certified](#))
- Django — GeeksforGeeks ([Certified](#))
